EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lavanya Rau on 02/05/2010.

The application has been amended as follows:

Claim 22 at line 7 read:

"...for amplifying said optical pulses; and"

Now reads:

- - - "...for amplifying said optical pulses; and a variable attenuator disposed between said modelocked fiber oscillator and said amplifier; and"- - -

Claim 22 at line 19 read:

"12nm."

Now reads:

- - - "12nm; and wherein said variable attenuator comprises polarization selection optics."- - -

Claims 31-41, and 55-74 are cancelled.

Election/Restrictions

Claims 2, 12, and 22 are allowable. The restriction requirement between species, as set forth in the Office action mailed on 01/31/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 6, 17, 18, 24, and 26 are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 2-6, 10-18, 20-26, 28-30, 42-49, 51-54 and 75-82 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2828

With respect to claims 2, 10, 12, 22, 25, 29, 42, and 81, the instant application outlines a pulsed amplifying system using a modelocked fiber oscillator, an amplifier, and additionally spectral filters, compressors, variable attenuators, and taps for feedback. Claims 2 and 22 further outline positioning of the components and the type of variable attenuator to be of the polarization selection type. Claims 10, 12, and 81 further limit the amount of attenuation achieved by the attenuating device. Claims 25 and 29 outline the amount of reduction of the spectral bandwidth via the spectral filter. Claim 42 further outlines the location of the elements and positioning of multiple taps for feeding back information to control the system. Prior art such as US 6885683 was found to teach the general system concept, but lacked details pertaining to either the element positioning, attenuation type, attenuation amount, or filtering amount. The claims are therefor believed to be in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
